

Stretta

3-INCH ARCHITECTURAL DOWNLIGHT

STRENGTH OF SOLAIS
Elegance of Stretta

CREATED BY SOLAIS®

SOLAIS® introduces

Stretta^{ST2}

THE HIGHEST POINT OF DOWNLIGHTS

Stretta, an Italian musical phrase meaning "narrow" and "tight," refers to a composition performed with acceleration to end in a crescendo!

This family of specification-grade, small-aperture downlight fixtures offers a sleek, minimalist design that makes a statement. Designed to meet the functional demands of the professional design community, Stretta is the perfect downlight for illuminating a magnitude of markets including commercial, residential, retail and hospitality.

Ratings + Certifications

- IC rated
- UL listed for dry and damp locations
- UL listed for wet locations with lensed trim or wall wash trim
- Spray foam rated
- Chicago Plenum rated
- Title 24 and JA8 compliant
- Airtight per ASTM E283
- Conforms to Washington State Energy Code

Small in size, big on features

Toolless driver access

Proprietary driver offers universal dimming to 1% for TRIAC, ELV and 0-10V. Compatible with third-party drivers, which include Lutron Hi-lume® and eldoLED SOLOdrive®.

Maintenance indicator

Driver is serviceable from below the ceiling. Features a maintenance indicator to simplify troubleshooting.

Low-profile 4-inch housing height

For all trim options, designed for new construction. It is inherently airtight, IC-rated and complies with Chicago Plenum requirements.

Square or round housing plate

Features alignment tabs for perfect collar installation. Housing plate serves as a guide to reduce measuring for ceiling cutouts.

Total adjustability

Magnetically held proprietary 40-degree vertical tilt, 360-degree rotation arm, allowing center-beam optics to be maintained through the inner trim aperture. Toolless arm is easily removed or adjusted post-installation to allow for below-the-ceiling “hot aiming” and accessory swaps.

Interchangeable plug-and-play module

Snaps into place, allowing for luminaire placement after housing installation. Provides lower cost of ownership.

Industry-leading LEDs

Enhanced two-step MacAdam Ellipse LED color binning is standard.

Solais designed TIR optics

Best-in-class performance, delivering excellent beam control that is clean, smooth and precise.

Module accessory holder

Holds up to two field-replaceable lenses and louvers.

Notched collars

Allow for easy, precise alignment during installation. Accommodate a 5/8" ceiling thickness and a 3/4" thickness for millwork.

Magnetic trim engagement system

Removes possible installation errors and minimizes risk for light leak, regardless of ceiling conditions. Holds up to one field-replaceable lens.

Stretta boasts versatility, performance and efficacy
